

Shenfield South MapRun Details as at May 2021

What Is It? This is the sixth of our Score Street O events, hosted on the MapRunF App or MapRun6 App on your mobile phone/Garmin watch. All of these events have the same format – you have one hour to find as many controls as possible and get back to the start/finish.

When Can I Do It? The intention was that it will be part of a series of courses available for a fixed period during 2021 to score points as part of a league. This league will be launched once the covid situation improves sufficiently. Meanwhile it is available for local exercise only. It is not an organised activity so you can do it individually whenever you like.

Who Can Do It? This activity is free and open to anyone, although all competitors take part at their own risk. This activity is not an organised event or activity, so you are not covered by British Orienteering's liability insurance. You do the activity as an individual for personal training only and you are responsible for both your own safety and the safety of others around you.

Regarding the Covid-19 pandemic, you must adhere to the latest [Government guidance](#) and the [British Orienteering guidance](#), which includes maintaining social distancing and respecting others. Slow down and give way to others where necessary to abide by the guidance.

Where Is It? The activity starts and finishes at Saint Andrew's Place, Shenfield, Brentwood CM15 8HH. There is free on-street parking available in this residential road though there is no parking Mon-Fri 10-11am to prevent commuter day-parking. Please park considerately.

The Start and Finish location is marked by a Fire Hydrant H Plate which is on a lamp post on your right once you have turned into Saint Andrew's Place from Priests Lane. It has the numbers 100/14 on the H plate.

Location: Saint Andrew's Place is halfway between Brentwood and Shenfield town centres. This residential road can be approached from Brentwood town centre east along Priests Lane, and from Shenfield town centre south along Friars Avenue.

Address: Saint Andrew's Place, Shenfield, Brentwood, Essex, CM15 8HH

OS Grid Reference: TQ 609 938 **Latitude & Longitude:** 51.620035 N 0.32324259 E

The course was designed by **Havering and South Essex Orienteering Club (HAVOC)**, the local orienteering club for the Brentwood area. In normal times we stage regular orienteering events in south Essex in local country parks and forests, as well as offering street-map based navigational challenges.

See our website for further details at: <https://www.orienteering-havoc.co.uk/>

How Does It Work?

1. Download the Shenfield South map from the HAVOC website to provide an A4 size paper map to use for navigation. [Shenfield_South_Score_May_2021-Map](#)
2. If you haven't already, install MapRunF software or MapRun6 software on your phone. Find the event under UK > Essex > Shenfield South. If you have a Garmin watch, you can take it with you on the run instead of your phone if [you install MapRunG](#).
3. When you are at the start location and ready to begin the activity, press 'Go To Start' and the App will automatically detect when you are at the start, "beep", and start your activity time. Each time you reach a control, the App will 'beep' to indicate successful passage if you have set it up to notify you that way. Otherwise, it will send you a silent text confirming the control number just visited, how many control sites you have visited so far, and how much time has elapsed since you started. The smart phone will display a digital version of the map which you could use for navigation as an alternative to the PDF paper map, but it is a bit small to read easily. Get as many points as you can within 60 minutes and return to base, where the App will automatically Finish and upload your score. Done!

Control Sites: All controls sites are fire hydrant display plates which are about A5 size portrait format (15cm x 10cm rectangles). They comprise a large black H on a yellow background. They are mostly at head height attached to a lamp post or other post. Some are lower, attached to walls or fences. A few are sited at 0.5m height on their own, yellow-painted concrete posts. The control descriptions provided on the map and separately as a PDF do not tell you the height of the yellow 'H' plate but do tell you precisely where it is in the circle relative to the mapped street and path network, e.g., southern road, SE side.

Scoring: Points will be awarded according to the first digit of each control number. Controls 11-18 are worth 10 points each, 21-28 are worth 20 points each, 31-38 are worth 30 points each and 41-46 are worth 40 points each. The higher scoring controls are harder to find or they are further from the start/finish. The activity is for 60 minutes and there is a time penalty of 10 points per minute for every minute late after 60 minutes. Test runs suggest that it would probably take you at least 90 minutes to visit all control sites, so you will need to choose to visit just some of the control sites if you wish to return in 60 minutes to avoid time penalties, or run very fast!

GPS accuracy: We have tested all the controls for GPS-worthiness (although you may have to wait a few seconds for your GPS track to catch up). If, despite being in the right place, a control refuses to register, there is a feature on the app called HITMO which you can use to record the visit after you have finished. These will be checked against the GPS track of your run.

Results: these are tabulated on the MapRunF or MapRun6 software.

Questions: please email maprun@orienteering-havoc.co.uk

Problems identified: please also email maprun@orienteering-havoc.co.uk I do hope that you enjoy this activity. Any feedback would be welcome to the above email.

Enjoy your run!
